Our values embrace all that is best in a top-quality British School, which also has a strong commitment to international education and the nurturing of international awareness, with special recognition of the school's British roots operating in an international environment.

We believe in providing a well-rounded education, which develops strong moral and ethical values and enables our students to respond to the challenges provided by the demands of modern life.

Students are encouraged to become aware of their responsibilities as kind and thoughtful individuals, mindful of the needs of others, in order to become valued and caring members of the school, local and global communities.

BISL recognises that students should be internationally aware and be able to contribute confidently to an inter-connected and inter-dependent world. The school strives to engage students with a range of experiences that will enhance learning and raise awareness of their national and international identity whilst preparing them for life in a diverse global society and competitive global economy.

The global dimension is reflected in the attitudes and values of students, staff and the wider school community.

Definition of International Education and Interculturalism- contextualise

International Education serves as a link between countries and cultures. International Education enables individuals to not only have good diplomatic relationships with one another but also to bring together people who are of different cultures, ethnicities, religions, faiths and who speak different languages aimed at creating a cross-cultural understanding where communication will no longer be a barrier. This cross-cultural understanding becomes transparent when one sees students working together, conducting research or simply engaging themselves in a study period for a class they are taking together. The language, customs, traditions, political relationships and religious beliefs that these students bring are connected through their educational endeavours.

The British International School of Ljubljana have committed to actively develop global citizenship in education through...

ETHICS...

research about, discussion of, and action related to issues of principle of personal, local, and global importance,

DIVERSITY...

The understanding of and respect for the similarities and differences of a range of individuals and peoples,

GLOBAL ISSUES...

the understanding of multiple perspectives of local and global events and issues,

COMMUNICATION...

the development of fluency in multiple languages, including mother tongues, used to communicate within and across cultures,

SERVICE...
