

# AI IN WARFARE AWARDS

Written by Fancy, Romina and Jade

The delegates of AI in warfare have all done an amazing job, few of them even achieved some honourable awards. The well-deserved winners are: Arvil, Rani, Denis, Rana, Stepan, Emelin and Haruki.

The award-winning delegates from the AI in Warfare committee shared their excitement about their achievements, describing the experience as amazing. They found the most rewarding part to be proposing resolutions and seeing them pass, while also enjoying the lighter moments of committee gossip. However, they admitted that certain aspects, like delivering the opening speech and working with unfamiliar or difficult delegates, were quite challenging. Despite this they agreed that MUN is a challenging, interesting, and educational experience that remains fun. Already looking forward to next year, they're eager to take on new roles and debates.
